

The **Forza FPA-0201** Stepdown Voltage Converter is the ideal solution to power 110-120 volt devices in regions where 220-240 volt electrical wall outlets are used. By stepping down the supply voltage, users can safely connect a wider range of small appliances and electronics operating at 110 to 120 volts. Lightweight, compact and portable, this stepdown voltage converter is perfect for the home, office or travel.

FEATURES

- Converts 220-240 volts down to 110-120 volts
- Accommodates grounded and ungrounded plugs
- Built-in fuse protection
- Intended to be used with devices rated at 50W or less

Main applications

- Videogame consoles
- Calculators
- Tablets & netbooks
- Portable radio/Mp3 players
- Cellular phone and phone chargers
- Shavers
- Answering machines, and much more
