2-year warranty

Your home in **one app**

The only remote you will ever need to control your appliances from anywhere

Nexxt Solutions introduces its new **Smart Home Automation Series**. Designed to suit your mobile lifestyle while building a safe environment inside and out your home, the brand seamlessly unifies into one user-friendly application a comprehensive line of fully integrated devices. From smart plugs, power strips, bulbs and cameras to security kits, you can now take control, schedule and run your own home devices, on your own schedule even when you are not there.

Inspired by the new era of IoT, the brand launches the next generation of **Smart IR controllers** designed to turn a smartphone into a universal remote. This smart remote uses reliable and stable IR signals to integrate the control of all your home entertainment and automation devices into a single app. Its voice activation feature makes it compatible with Google Assistant and Amazon Alexa for hands-free management of linked devices. Now you can customize your own home experiences, by controlling the activities of multiple appliances and electronics, like setting the thermostat temperature, turning up or down the volume, or activating entertainment components, all from a single source and with nothing more than a touch or a simple voice command!

Highlights

• Replace multiple remotes with a single smart IR controller
• Conveniently integrates your home entertainment and automation devices into one app
• It uses Wi-Fi signals to communicate and send commands to compatible electronics and appliances in your home
• Supports up to 50 IR controlled devices, including TVs, set top boxes, DVDs, fans, audio systems and even air conditioners *
• Works with Amazon Alexa and Google Assistant
• By adopting the self-learning technology, it is able to detect the codes of your original remotes automatically**
• Easy to share, so members of your family can also have access to the same remote from different mobile devices
